

Bed Assembly Instructions

Captains Bed

Step-1

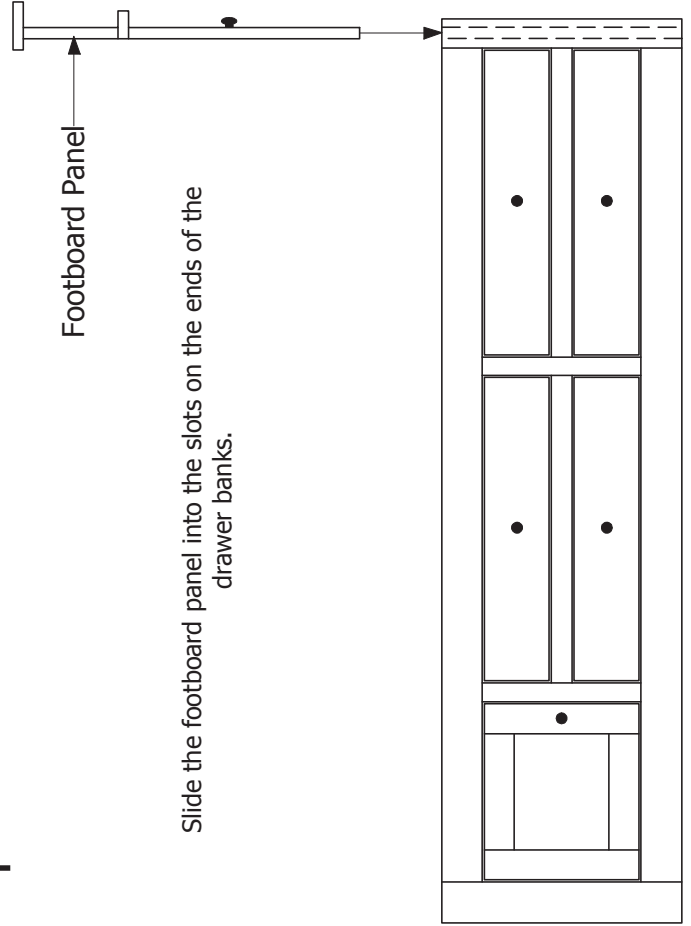

Allowing room for the headboard (if included), position the 2 drawer banks back-to-back where the bed will be located. Use the included platform to determine the spacing. Set the panels in place and install the 16 provided short screws into pre-drilled holes.

NOTE: Twin size bed platform will be 1 piece.

Step-2

Slide the footboard panel into the slots on the ends of the drawer banks.

Step-3

Position headboard or bookcase headboard against assembled drawer banks and check spacing on both sides to ensure it is properly centered. Holding headboard firmly against each drawer bank, drive 3 provided long screws through the pre-drilled holes in the platform and into headboard post on both sides as shown. Note that the top screw location, position A on the drawing, is located just below the rim at the top of the platform. The other two screws, in positions B and C, are accessed through the small door.

NOTE: Headboard posts and bookcase headboards are not pre-drilled.
